Carlos Cabana Lesson

Find the y-intercept and the x-intercepts of the following equations:

1. $y = (6x + 1)(6x - 1)$

2. $y = x^2 - 3x + 6$

3. $y = x^2 - 6x - 7$

4. $y = x^2 - 5x + 4$

5. $y = x^2 + 4x - 12$
