

MIA BULJAN: Turn and talk to the person next to you. What do you see and how do you know if it matches or not? So, okay. So we have a lot of kids out today, so...

STUDENT: I see the ten, six makes sixty. Thirty and two equals thirty-two, and thirty-four equals thirty-four, and the thirty plus eight equals...wait, no. The ten plus eight equals eighteen, so I agree with her. So your turn.

STUDENT: Um... I... I agree.

STUDENT: Why?

STUDENT: We both agree that they both match.

STUDENT: They both match. The ten and the six, they match. For the sixteen and the ten and the six, they match.

STUDENT: Yeah.

MIA BULJAN: You're starting to see it? Tell Arielle. Arielle needs to hear this great idea. Arielle. Arielle, look at him so he knows you're listening, okay?
