

Three Act Task Recording Sheet: Sugar Cubes

Date 3-20-19

What questions come to your mind as a mathematician when seeing this video?

- How many sugar cubes fill the box?
- How many sugar cubes are actually in the box?
- How big are the sugar cubes?

Main Focus Question How many sugar cubes are in the box?

Act 2

What information would you like to know or need to know to solve the problem?

- How big is the box?
- How big is one sugar cube?
- How do they place the sugar cubes in the box?

Estimate:

Any observations made after seeing the second video?

- 3 rows
- 6 columns
- 18 in each layer
- 180

Use this area for work, tables, calculations, sketches, to find the final solution-

Date _____

Name _____

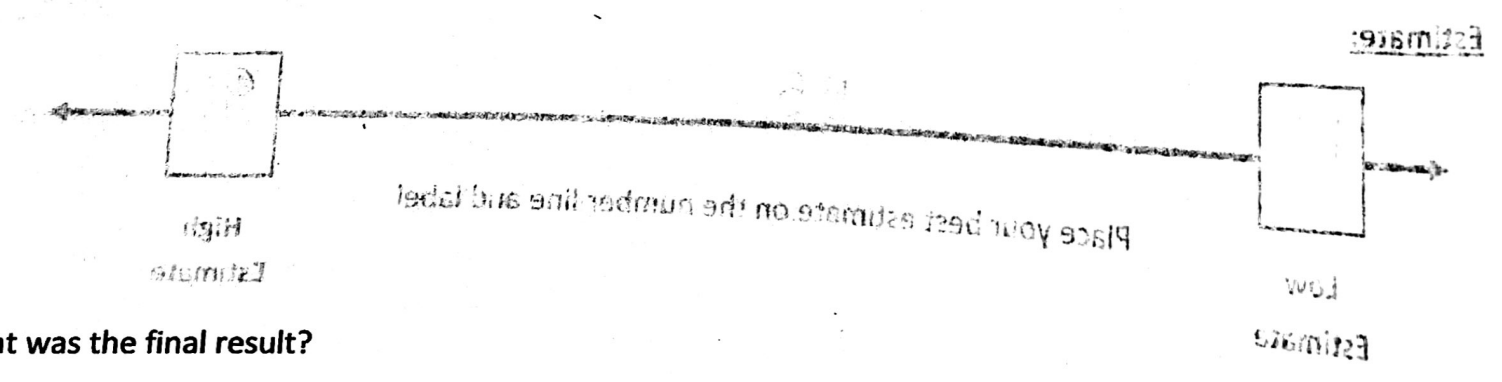

Act 1

 198
 \end{array}$$

Act 3

Act 2

Record any new information provided and calculate the final solution. Please be sure to label clearly.

What was the final result?

Three Act Task Recording Sheet: Sugar Cubes

Date 3.20.19

Act 1

What questions come to your mind as a mathematician when seeing this video?

- How many cubes can fit in the box?
- How big is each cube?
- How big is the box?
- How many cubes are actually in the box?

Main Focus Question How many sugar cubes are there in the box?

Act 2

What information would you like to know or need to know to solve the problem?

- The size of the box
- The size of the sugar cubes
- The placement of the sugar cubes

Estimate:

Any observations made after seeing the second video?

- 6 columns (3 in each)
 - 3 rows (6 in each)
 - 18 in each layer
- Estimate: 180

Use this area for work, tables, calculations, sketches, to find the final solution.

$$\begin{array}{r} 18 \\ \times 11 \\ \hline 18 \\ + 180 \\ \hline 198 \end{array}$$

Act 1

What questions come to your mind as a mathematician when seeing this video?

Act 3

Record any new information provided and calculate the final solution. Please be sure to label clearly.

Act 3

What information would you like to know or need to know to solve the problem?

What was the final result?

Any observations made after seeing the second video?

Three Act Task Recording Sheet: Sugar Cubes

Date Mar 20 2019

Act 1

What questions come to your mind as a mathematician when seeing this video?

- How many more or sugar cubes are in the box?
- How many sugar cubes are in the box?
- How many calories? - 1
- How much does each box cost?

Main Focus Question How many sugar cubes are in the box

Act 2

What information would you like to know or need to know to solve the problem?

- The sizes of Sugar Cubes
- The placement of the cubes

Estimate:

Any observations made after seeing the second video?

- 6 columns the height
- 3 rows is about 10
- about 180 cubes in box

Use this area for work, tables, calculations, sketches, to find the final solution-

$$\begin{array}{r}
 18 \\
 \times 11 \\
 \hline
 18 \\
 + 180 \\
 \hline
 198
 \end{array}$$

$$\begin{array}{r}
 100 \\
 + 80 \\
 + 18 \\
 \hline
 198
 \end{array}$$

Act 2

Main Focus Question

the box

Three Act Task Recording Sheet: Sugar Cubes

Date 3-20-19

What questions come to your mind as a mathematician when seeing this video?

- How many more sugar cubes are in the box?
 - How many sugar cubes are in the box?
 - If one sugar cube weighs 1 gram and the box weighs 453g wouldn't there be 453 sugar cubes in the box?
- Main Focus Question** How many sugar cubes are in the box?

Act 2

What information would you like to know or need to know to solve the problem?

- Size (box)
- Size (sugar cube)
- placement of sugar cubes in box

Estimate:

Any observations made after seeing the second video?

- 3 rows
- 6 columns
- height about 10
- about 180 cubes in box

Use this area for work, tables, calculations, sketches, to find the final solution-

$$\begin{array}{r}
 18 \\
 \times 11 \\
 \hline
 18 \\
 + 180 \\
 \hline
 198
 \end{array}$$

Act 3

Record any new information provided and calculate the final solution. Please be sure to label clearly.

What was the final result?

Three Act Task Recording Sheet: Sugar Cubes

Name _____

Date 3-20-19

Act 1

What questions come to your mind as a mathematician when seeing this video?

How many sugar cubes are in all?
 How much does each one cost?
 Sugar cubes are just sugar just sugar.

Main Focus Question How many sugar cubes are in that box?

Act 2

What information would you like to know or need to know to solve the problem?

Are they only going to fill it half way or to the top?

What is the LTV of the box and sugar cubes.

Estimate: Could the sugar cubes

equal a one? break and

Any observations made after seeing the second video?

$3 \times 6 = 18$ cubes per layer

$$\begin{array}{r} 18 \\ \times 12 \\ \hline \end{array}$$

$$1 \ 36$$

Use this area for work, tables, calculations, sketches, to find the final solution-

$$\begin{array}{r}
 216 \quad 18 \\
 \times 12 \\
 \hline
 36 \\
 + 180 \\
 \hline
 216
 \end{array}$$

Act 3

Record any new information provided and calculate the final solution. Please be sure to label clearly.

$$\begin{array}{r}
 \times 18 \\
 \hline
 18 \\
 + 180 \\
 \hline
 198
 \end{array}$$

High Estimate

What was the final result?

198 sugar cubes in each box

Three Act Task Recording Sheet: Sugar Cubes

Date 3-20-19

What questions come to your mind as a mathematician when seeing this video?

What is the length, width, height and volume of the box?

How many cubes are in 1 box?

How much does each box cost?

Main Focus Question How many sugar cubes are in that box?

Act 2

What information would you like to know or need to know to solve the problem?

What is length and width of one sugar cube?

What is the length and width of the whole box?

Are the sugar cubes all the same size?
Is the box filled to the top?

Estimate:

Any observations made after seeing the second video?

3x6 area

They are stacked

$$\begin{array}{r}
 5 \\
 \times 18 \\
 \hline
 128 \\
 \times 12 \\
 \hline
 108 \\
 \hline
 236
 \end{array}$$

Use this area for work, tables, calculations, sketches, to find the final solution-

$$\begin{array}{r}
 18 \\
 \times 12 \\
 \hline
 36 \\
 + 180 \\
 \hline
 216
 \end{array}$$

18 in one layer.

I think there are 12 layers.

Act 3

Record any new information provided and calculate the final solution. Please be sure to label clearly.

$$\begin{array}{r}
 18 \\
 \times 11 \\
 \hline
 18 \\
 + 180 \\
 \hline
 198
 \end{array}$$

$3 \times 6 \times 11 = \text{Volume of box}$

What was the final result?

198 sugar cubes in one full box.

Three Act Task Recording Sheet: Sugar Cubes

Date 3-20-19

What questions come to your mind as a mathematician when seeing this video?

- How many sugar cubes are there?
- Why did he show us the side of the box?
- What are the sugar cubes for?

Main Focus Question How many sugar cubes are in the Box

Act 2

What information would you like to know or need to know to solve the problem?

- Are all sugar cubes the same size?
- Will they fill to the top or half way?
- What's the volume of the box?
- Did some break?

Estimate:

Any observations made after seeing the second video?

$$3 \times 6 = 18$$

$$18 \times 7 =$$

$$\begin{array}{r} 4 \\ \times 18 \\ \hline 6 \\ \hline 108 \end{array}$$

$$\begin{array}{r} \uparrow \\ \times 18 \\ \times 12 \\ \hline \times 36 \\ \hline 180 \\ \hline 216 \end{array}$$

Use this area for work, tables, calculations, sketches, to find the final solution-

216

$$\begin{array}{r} 18 \\ \times 12 \\ \hline 36 \\ 180 \\ \hline 216 \end{array}$$

11 Rows!!

Act 3

Record any new information provided and calculate the final solution. Please be sure to label clearly.

$$\begin{array}{r} 18 \\ \times 11 \\ \hline 180 \\ 198 \\ \hline \end{array}$$

What was the final result?

198 Sugar cubes!

Three Act Task Recording Sheet: Sugar Cubes

Date 3-20-13

What questions come to your mind as a mathematician when seeing this video?

- How many sugar cubes are there?
- How much does the box of sugar cubes weigh?
- How much does a cube of sugar weigh?
- How much does each box cost?

Main Focus Question How many sugar cubes are in the box

Act 2

What information would you like to know or need to know to solve the problem?

I would like to know the length the width and the height of the sugar cube and the box

Estimate:

Any observations made after seeing the second video?

On each layer there is 18 cubes. On the sides there is 3 cubes and on the front there is 6 cubes.

Use this area for work, tables, calculations, sketches, to find the final solution-

$$\begin{array}{r}
 18 \\
 \times 12 \\
 \hline
 36 \\
 + 180 \\
 \hline
 216
 \end{array}$$

Act 3

Record any new information provided and calculate the final solution. Please be sure to label clearly.

There is 11 rows of 18 sugar cubes

What was the final result?

$$\begin{array}{r}
 18 \\
 \times 11 \\
 \hline
 18 \\
 + 180 \\
 \hline
 198
 \end{array}$$

Three Act Task Recording Sheet: Sugar Cubes

Name _____

Date 3-20-19

Act 1

What questions come to your mind as a mathematician when seeing this video?

How many sugar cubes dots are there?
 How much sugar cubes dots will there be if you put it in fourths?

Main Focus Question How many sugar cubes dots are there in the box?

Act 2

What information would you like to know or need to know to solve the problem?

I will like to know the length, width, and height, to find how much sugar cubes

Estimate:

$$\begin{array}{r} 12 \\ \times 12 \\ \hline 136 \\ + 180 \\ \hline 216 \end{array}$$

Any observations made after seeing the second video?

There is 2 length and 6 width so there is 12 cubes in every layer

Use this area for work, tables, calculations, sketches, to find the final solution-

$$\begin{array}{r} 18 \\ \times 12 \\ \hline 36 \\ + 180 \\ \hline 216 \end{array}$$

$$\begin{array}{r} 12 \\ \times 18 \\ \hline 96 \\ + 120 \\ \hline 216 \end{array}$$

Act 3

Record any new information provided and calculate the final solution. Please be sure to label clearly.

There is 11 height, 3 length,
and 6 width so there is 198

$$\begin{array}{r} 18 \\ \times 11 \\ \hline 18 \\ + 180 \\ \hline 198 \end{array}$$

What was the final result?

There is 198 sugar cubes,

$$\begin{array}{r} 18 \\ \times 11 \\ \hline 18 \\ + 180 \\ \hline 198 \end{array}$$

Three Act Task Recording Sheet: Sugar Cubes

Date 3/20/19

What questions come to your mind as a mathematician when seeing this video?

How many sugar cubes come in that particular box?

How much sugar does it contain?

Are there any other shapes that you can make it into instead of cubes?

Main Focus Question How many sugar cubes are in that box?

Act 2

What information would you like to know or need to know to solve the problem?

I would like to know length, the width, and the height because you need to know the height of the cube to figure out how tall the cube is.

Estimate:

Any observations made after seeing the second video?

Some observation that I made was there was 6 at the bottom and 3 on the side which is 18 because $6 \times 3 = 18$ but there is other cubes on the bottom holding it up which makes it more than 18 cubes or sugar cubes.

Use this area for work, tables, calculations, sketches, to find the final solution:

$$\begin{array}{r}
 + \\
 18 \\
 + \\
 18 \\
 \hline
 36 \\
 + \\
 180 \\
 \hline
 216
 \end{array}$$

Name _____

Act 1

What questions come to your mind as a mathematician when seeing this video?

Main Focus Question

Act 3

Record any new information provided and calculate the final solution. Please be sure to label clearly.

There all going down and 3 going up and 6 going over so I would multiply $11 \times 6 = 66$ and then $66 \times 3 = 198$.

What was the final result?

Any observations made after seeing the second video?

Three Act Task Recording Sheet: Sugar Cubes

Date March 20, 2019

What questions come to your mind as a mathematician when seeing this video?

how many cubes are left in the box?
how much does one cube weigh?
how much sugar does it contain?

Main Focus Question How many sugar cubes are in the box?

Act 2

What information would you like to know or need to know to solve the problem?

I would like to know the length, width, and the height to find the length of the box?

Estimate:

Any observations made after seeing the second video?

There are 3 cubes and 6 cubes.

Use this area for work, tables, calculations, sketches, to find the final solution-

$$\begin{array}{r} \times \\ 18 \\ \hline 36 \\ 180 \\ \hline 216 \end{array}$$

Act 3

Record any new information provided and calculate the final solution. Please be sure to label clearly.

There are 11 layers of 18 cubes in each layer of cubes.

What was the final result?

Three Act Task Recording Sheet: Sugar Cubes

Date 3-20-19

Act 1

What questions come to your mind as a mathematician when seeing this video?

How many sugar cubes are in one box?
Are the sizes of the sugar cubes the same?
Do the sugar cubes fill to the height and width of the box?

Main Focus Question How many sugar cubes are in one box?

Act 2

What information would you like to know or need to know to solve the problem?

We need to figure out the size of each sugar cube.

We need to figure out how big the box

Estimate: 15

Any observations made after seeing the second video?

$$3 \times 6 = 18$$

$$18 \times 6 = 180$$

$$18 \times 5 = 90$$

Use this area for work, tables, calculations, sketches, to find the final solution-

~~$18 \times 5 = 90$~~

~~$18 \times 6 = 180$~~

198

$$\begin{array}{r}
 18 \\
 \times 11 \\
 \hline
 180 \\
 + 180 \\
 \hline
 198
 \end{array}$$

Act 3

Record any new information provided and calculate the final solution. Please be sure to label clearly.
