

00:00 Entonces la d?

So, then, D?

00:04 Es 4... de aqui es 4x?

Is 4, from here is 4x?

00:07 -6 mas 2...

-6 plus 2.

00:16 Cual esta el numero?What is the number?

00:17 Negativo...

Negative...

00:19 2?

2?

00:20 Mm hm.

Mm hm.

00:21 Menos dos? O 6?

Minus 2? or 6?

00:23 Porque 6 mas -2... será...Because 6 plus -2.. will be...

00:28 Entonces...

So...

00:31 Igual a 4. Mas 4x, menos 0. Equals 4. Plus 4x, minus 0.

00:50 4x, que?

4x, what?

00:53 Aqui...tengo x ... y tengo que empezar en las 6....

Here, I have x, and I have to start on 6...

01:02 Mm mm. Esperame. Aqui tienes que...

Mm hm. Hold on. Here you have that...

01:08 No mas usa.. tienes ese para x. Ya sabes que cuando hay un numero, cuando no nada mas tienes que poner.... Uno...y el 4.
You have to use... you have that for x. You already know that when you have a number, then you don't have to put anything else... 1 and 4.

01:30 Y ya. Y este la de x, tienes que hacer un t-table con los ceros a los lados? Y vas a poner 4.

And now. And the x, you have to do a t-table with the zeros on the sides? And you're going to put 4.

01:39 Like that?

Like that?

01:41 Mm hm. Y vas a poner ... si. Un 1, y un 4 a los lados. Porque son las x, las calculas como son en la grafica.

Mm hm. And you're going to put.. yes. A 1, and a 4 on the sides. Because they're x, you calculate them like they are on the graph.

01:53 Esta, aqui.

This, here.

01:54 Con...

With...

01:55 Uno?

One?

01:56 Y el cuatro, al otro lado.

And the 4, on the other side.

01:59 Aqui?

Here?

02:02 Y ahora, como para sacar y, tienes que volver a bajar estos numeros aca. Estos. And now, to get y,
you have to bring down these numbers here. These.

02:07 Ya esta, para que... That's it, for what....

02:08 No. Esto. Del 0, esto, aqui. Pa' abajo. Ya tienes los puestos. Esto para aca. Tienen 0, no mas, x.

No, this. From the 0, this, here. Comes down. You already have their place. This goes here. You have 0, so then, x.

02:20 Ok. Escojan una de las 2 o 3.

Ok. Pick one from 2 or 3.

02:23 Dos.

Two.

02:2 Dos. Gracias. Esto de quien es?

Two. Thanks. Whose is this?

02:29 De Leticia.

Leticia's.

02:29 Ya lo calificué, ¿verdad? Es perfecto.

I already graded it, right? It's perfect.

02:37 Ok. Este de quien es? Jesus? Ok. Esto esta todo correcto, lo que te falta es el primer paso, en este caso.

Ok. Whose is this? Jesus? Ok. This is all correct, what you're missing is the first step, in this case.

02:46 Cual es?

Which is it?

02:47 Que estas buscando aqui?

What are you looking for here?

02:48 El valor de... o sea..

The value of... that is...

02:51 Ah hah.

Uh huh.

02:51 A substituir x.

To substitute x.

02:53 Aja, por que?

Uh huh. For what?

02:54 Por 0.

For 0.

02:55 Exacto. Asi, lo puede ser puesto o encima, abajo, algo asi, pero tenemos que ver que estas substituyendo a 0.

Exactly. So, you can put it either above, below, something like that, but we have to see that you're substituting for 0.

03:02 Esto esta bien. Ahora si el proximo paso, no, se va a demostrar, yo se que abase de eso puedes encontrarlo a 6. Es todo correcto.

This is good. Now the next step, no, you're going to show -- I know that based on this you can find the 6. This is all correct.

03:09 Y esto, aqui, es perfecto. Aqui tienes la ecuacion, el 0, y las respuestas.

And this, here, is perfect. Here you have the equation, the 0, and the answers.

03:16 Ok.

Ok.

03:21 Mm hm.

Mm hm.

03:24 Good, perfect, Jesus. Ok.

Good, perfect, Jesus. Ok.

03:33 Ok. Este es tuyo, Leticia?

Ok. This one is yours, Leticia?

03:36 Mm.

03:37 Ok.

Ok.

03:39 Um... ah.

Um... ah.

03:42 Ok. Esto esta correcto, pero, tampoco necesario.

Ok. This is correct, but unnecessary.

03:46 Porque aqui estas buscando... que estas buscando, aqui?

Because here you're looking for-- what are you looking for, here?

03:52 El y-intercept?

The y-intercept?

3:53 Mmm hm. Y... como, como se empieza?

Mm hm. And.. how.. how do you start it?

03:56 Cruzando x por cero?

Crossing x with 0?

03:59 Exacto. Si hubieras hecho aqui, que te diera?

Exactly. If you'd done that here, what would it give you?

04:05 Te diera la respuesta exactamente, verdad?

It would give you the exact answer, right?

04:07 0, el ultimo.

Or, the last.

04:09 Asi que ya es un numero, 0 es un numero tan facil, siempre te conviene poner el 0 primero y luego preguntar --

So it's already a number, 0 is such an easy number, it's always convenient to put the 0 first and then ask --

04:16 ok, cual es el algebra que debo hacer para resolver por x?

Ok, what algebra do I need to use to solve for x?

04:19 O por y. Ok? Pero, lo tendrias que factorizar igual, porque si substituye 0 por y aqui, eso si no puedes resolver sin los factores.

Or for y. Ok? But you have to factor it equally, because if you substitute 0 for y here, then you can't solve it without the factors.

04:29 Ok. Y este paso tambien te falta.

Ok, and you missed this step as well.

04:32 Abase de esto, no puedes aguantar la respuesta todavia.

Based on this, you're not going to be able to get to the answer yet.

04:38 Porque le falta substituir 0.

Because you missed substituting 0.

04:39 Aha. Sin el 0, mmm hmm.

A ha. Without the 0, mm hmm.

04:45 Porque si no se preocupa que estan siguiendo el mismo procedimiento, siempre el mismo, sin saber las razones,

Because if you're not mindful about following the same procedure, always the same, without knowing the reasons,

04:50 Sin saber porque estan haciendo lo que estan haciendo? Ok?

Without knowing why you're doing what you're doing, ok?

04:53 Asi que si este fuera en un examen no te hubiera dado un A+, por esto aqui. Esto esta todo correcto, pero por esto no hubiera sido un A+. Ok?

So if this had been an exam, I wouldn't have given you an A+, for this here. It's all correct, but because of this it wouldn't have been an A+. Ok?

05:02 Para que te sabes eso.

So that you know that.

05:07 Y tambien es de Leticia, aja... ok.

And this one's also Leticia's, a ha. Ok.

05:11 En cual estamos, la e?

Which one are we on, E?

05:16 En cual estamos?

Which one are we on?

05:19 La e. Pero de Dulce. Seguiria, entonces. La f.

E, but Dulce's. Let's go on then, to F.

05:27 2e, donde esta?

2e, where is it?

05:28 Esto.

This.

05:29 Esto es la e...

This is the E.

05:30 A, ya lo se. Pero ya tiene un A+, no se por que.

Ah, I know. But this already has an A+, I don't know why.

05:37 Gerardo, get to work.

Gerardo, get to work.

05:41 Perfecto.

Perfect.

05:43 Asi substituye...

So substitute...

05:44 Mm hmm. Ok. Esta todo perfecto tambien. Excellent, you guys. Nice job. Ya que tienes, asi? Ok. Sigam lo de atras, y ya. Ya les puse el A+.

Mm hmm. Ok. This is all perfect too. Excellent, you guys. Nice job. You have it, like this? Ok. Go on to the back, and done. I already gave you an A+.
