inside + x = ÷ mathematics

Part and Whole

Level B

Maggie and Lexie were making funny shapes out of flat clay. They decided to play a game. Maggie would make a clay shape, and Lexie would have to divide the clay shape using one cut-line. The two pieces would not have to look the same, but they would have to be the same size (same amount of clay). Below are Maggie's clay shapes. Show where Lexie should make a cut-line to make two pieces so both would be the same amount of clay.
