The Shape of Things

Level B

Laura and Jacob are drawing pictures to give to friends. Laura made a drawing using some shapes and a line of symmetry. She used the folded edge as the line of symmetry. Draw a picture of what the paper will look like when it is unfolded.

Jacob made a drawing with 5 shapes in all. When it was finished, he noticed that:

- his drawing had one line of symmetry
- his drawing had 4 shapes that had 4 corners
- his drawing had 1 shape that had 3 corners

Show what Jacob's drawing could have looked like.

Explain why you drew the drawing you did.
